Customer may need to provide the pool with maintenance between Cozy's visits.

This may be necessary due to events such as rain storms, algae contamination, high winds or excessive heat. This may require that the customer perform interim tasks such as: adding extra chemicals, emptying polaris bag, cleaning the skimmer baskets, backwashing filter or brushing. Time allotted is up to 1 hour per visit as needed. If requested Cozy can provide extra visits or additional time (for storm clean up or parties) at a charge of \$65 per half hour.

Day of service cannot be guaranteed and is dependent on jobsite location, weather and may change as the season progresses.

X **One Time Cleanup Program:** \$150.00 for 1 Hour of vacuuming; Each half hour after will be \$55.00; additional visits will be billed at \$55.00 per half hour

Pool must be clear to bottom in order to vacuum – no blind vacuuming will be done. The pool may need several visits if the filter pressure raises. Filter pressure may require us to backwash – repeatedly during the cleaning. If repeated backwashing is required customer will be responsible for filling the pool to appropriate level to operate the pool. Water will be tested after cleanup and the report will be given to customer. Chemicals will not be added during visits.

If cartridges these may need to be cleaned at a rate of \$89.00 and will be done off site.
